Phone Number: 325-668-5085

Further Comments:

We have several concerns regarding the building and potential use of the property to run a construction business.

- We are somewhat concerned about the general appearance of the property. While we understand that the city may not have the authority to enforce building material requirements, we would like the council to take steps to ensure that the UDC appearance requirements remain an important part of the decision making process. Maintaining the standards of structures built in the area are important to retaining the property values of the neighborhood and retaining the feel associated with larger lots in the area.
- The second issue is the potential use of the property for purposes other than as an accessory building to single family dwelling. Due to observations of frequent traffic to and from the residence by a variety of vehicles on the narrow street, we are concerned that adding storage space could potentially increase traffic and reduce the level of tranquility in the neighborhood.

We do not have an issue with the construction of an accessory structure, we would just like the council to ensure that both the appearance and potential use of the location are taken into account when issuing the permit.

Further Comments:

*We do oppose a non masonry building going in to our neighborhood. These are million dollar properties, and we are taxed as such. We would think that any structure that you would allow to be built would fit this aesthetic.

*We request that Mr. Ahler upholds the standard of our neighborhood, and use masonry for his new workshop.

*We feel this home addition 'shop' should not be used for business purposes, and keep with the single-family dwelling. We understand he owns his own contractor business, but we want to keep it family oriented. There are already trucks coming in and out of his property, and this shop will only further his business, not our family oriented neighborhood.

*The property is not kept up as nicely as the other homes in the neighborhood, and now this shop further separates his property aesthetically from the rest of the neighborhood.

*We are not in disagreement that he builds on his property, but wish he would construct to fit the look of the surrounding homes.

*We feel his continued construction on this property lowers the property values adjacent to him.

Further Comments:

- We are somewhat concerned about the appearance of the existing structure and the general upkeep of the property. Our homes were required to meet certain standards when built which has helped to increase overall property values and maintain standards. The overall size of this new structure is large enough that the aesthetic impacts the neighborhood.
- Additionally, we are concerned regarding the potential for this property to be utilized for purposes beyond an accessory building to a single family dwelling. We have observed frequent traffic to the residence from a variety of vehicles such as trucks with trailers and the storage of materials. Our concern is that the increase in the building could lead to an increase in additional traffic to our neighborhood.
- It is our desire for our neighbors to enjoy their properties and make them work well for their families. We are hopeful that an amicable solution can be found.
