

Who We Are

With combined revenue of over \$12 Million between 2 locations, we are working on adding a Southern California location to secure controlling territories in 3 of the largest trailer markets in the country.

Customers come to us from all over the county and from all areas of Texas including Houston, Austin, San Antonio and others. We also regularly ship custom unit abroad.

Customers from all walks of life bring us their designs for specific applications and we bring them to life like no one else in the industry.

What We Do

We specialize in custom designed trailers, where other dealers just want to sell what is on their lot. This approach gives us a step up over our competition and allows us to keep inventory levels moderate while keeping revenue high.

The goal is to have examples of trailers on the lot and then push for custom orders which frees up cash flow and has forged our reputation as the place to go for highly custom trailers.
