260121 Rosebury-Tree Mitigation Plan.pdf; 260121 Rosebury-Tree Cons Plan.pdf;

Sarah & Alexis,

Attached is my attempt to show how the trees that have to be removed during the development of Rosebury would qualify for either being exempt or non-exempt (from the mitigation requirements), and easily communicate how we determined it. This is a revised plan from the one I sent a week ago, because of a water line easement which has been added.

We understand, as we discussed, that the ordinance addresses it in two parts; first for the development, and then, on a one-by-one basis the lot trees. Unfortunately, because of the grades, the lots where most of the trees are must be graded with the development, so we are asking for the two phases be considered as one.

So, using color to show the different types of exempt areas, here's my description of how we did it:

1. The blue shaded area is exempt because it is in the street ROW, a 10' utility easement along the street frontage, and a water line easement through the Commercial tract.
2. The yellow areas are exempt because that is the "building pad" areas within the setbacks.
3. The purple areas show the "additional 20%" area on the lots which could also be designated exempt. You said we could place that wherever we want, so we've chosen areas where removed trees are.

All "exempt" trees are uncolored. The trees we're saving are colored green- consistent with the also attached Tree Conservation Plan. There are no "non-exempt trees" remaining, to need mitigation.

I tried adding these exhibits to the portal, but there appears no way to do that at this point, so please add these to the record. Please let me know if this makes sense to you, and is acceptable. Thanks.

Regards-
