SCOPE OF SERVICES AND RESPONSIBILITIES OF CLIENT

PROJECT UNDERSTANDING

Within six months of completion and certification of the RRA, America's Water Infrastructure Act of 2018, Section 2013 also requires a letter of certification to EPA that the Emergency Response Plan (ERP) for a utility is developed or updated. The ERP can be developed based on existing emergency plans but is required to include response protocols for any type of emergency or event identified as a threat during the RRA.

While not required by the AWIA of 2018, the City has elected to evaluate its wastewater collection system using the same process required of water systems by the AWIA.

EMERGENCY RESPONSE PLAN

The AWIA requires the Emergency Response Plan to include:

- Strategies and resources to improve the resilience of the system, including the physical security and cybersecurity of the system
- Plans and procedures that can be implemented, and identification of equipment that can be utilized, in the event of a malevolent act or natural hazard that threatens the ability of the utility to deliver safe drinking water
- Actions, procedures, and equipment which can obviate or significantly lessen the impact of a malevolent
 act or natural hazard on the public health and the safety and supply or drinking water provided to
 communities and individuals, including the development of alternative water source options, relocation
 of water intakes, and construction of flood protection barriers
- Strategies that can be used to aid in the detection of malevolent acts or natural hazards that threaten the security or resilience of the system
- Coordination with the Local Emergency Planning Committee (LEPC)
- Record documentation of the Emergency Response Plan for five (5) years upon certification

The detailed ERP will be conducted generally following the protocols detailed in the M19 (Emergency Planning for Water and Wastewater Utilities) guidance developed by the AWWA. The ERP will be finalized and then certified by the City to the Administrator of the Environmental Protection Agency (EPA) within six (6) months of certification of the City's Risk and Resilience Assessment (generally by Dec 30, 2021) to comply with the deadline requirements for systems serving a population less than 50,000 but greater than 3,300.

ARTICLE I

BASIC SERVICES: FNI shall render the following professional services in connection with the development of the Project:

PHASE 2 - EMERGENCY RESPONSE PLAN

FNI will prepare an initial inventory of available information to review/update and gaps in information where development by the ERP team will be required. The ERP will be developed generally according the outline identified in the AWWA M19 guidance document. FNI will coordinate with the City to utilize the City's existing ERP format as practicable.

FNI will conduct an initial workshop (ERP Preparation Workshop) with the ERP team. In this workshop, FNI will provide an overview of the proposed ERP contents and approach and the current status of information to fulfill these needs. A schedule of up to two (2) total ERP workshops will be established.
