

Dear Neighbor,

As you know, we are planning on doing a renovation of our house. The renovation will include 2 sets of garages on each side of the house. Both sets will be staggered, front facing garages that are set back from the front of the house. The garages will be attached to the house and follow reflect the same colour and style of the house. Landscaping around the garages and driveways/apron will be used to beautify the house.

Below shows the garage locations in relation to the main part of the house. As you can see they are recessed back a great deal from the front of the house which breaks up the front elevation of the house and gives interest to the side of the house.

This letter is to ask for your approval of the and location and layout of the garages. Please complete the section below to indicate that you do approve the location and layout of the garages as we have intended.

☒ I approve ☐ deny the design and layout of the garages as indicated.
