Dear City Council Members,

My husband and I have been residents of Keller since December of 1995 at the same location.

I am against the proposal brought forward by the members of Northwood Church to rezone the property.

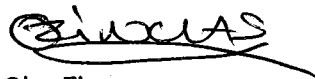

I would rather see a mix of retail, such as medical/professional offices, maybe a couple of nice restaurants, or even an elderly care/retirement community. The developer will come in, level everything out, wipe out all those beautiful trees, including the ones that are not in their way, make their millions and disapper. I feel the location is just not ideal for single family homes.

My husband and I, are constantly shopping and dinning in Southlake and grapevine because we have none here in Keller. Even Roanoke has more restaurants and shops on N Oak Street. I can name one, just one upscale(fine dinning) restaurant here in keller...only one!

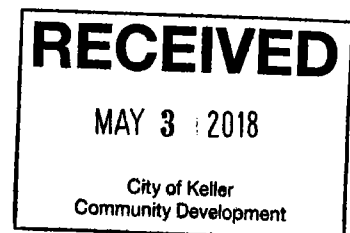

Please, vote wisely and to the best interest of the City and residents....the member's of Northwood Church will get their money no matter who buys the land, but the City must decide what's in the best interest of the community as to how this land is utilized.

Thank you for your time.

Sincerely,

Olga Zingas

Dear City Council Members,

My wife and I have been residents of Keller since December of 1995 at the same location, and have managed to raise three sons, two in college and the youngest graduating this year from KHS.

Rezoning this piece of land to housing, eventhough it sounds good, I am against the proposal brought forward by the members of Northwood Church.

What the city council needs to seriously consider, is what's really best suited for the city and it's residents as a whole, not just the seller's willingness to cash in on the deal and the greedy developer's ambitions to get their share.

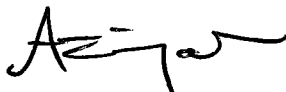

I would rather see a mix of retail, such as medical/professional offices, maybe a couple of nice restaurants, or even an elderly care/retirement community. The developer will come in, level everything out, wipe out all those beautiful trees, including the ones that are along the edge of the field, make their millions and disappear. I feel the location is just not ideal for single family homes.
