Re: Waterslide Certification, Indoor

Keller Aquatic Center
405 Ruse Snow Drive
Keller, TX 76248

To whom this may concern:

This letter is to certify that Splashtacular, Inc has designed the waterslides for the above referenced project in accordance with the project plans and specifications prepared by Brinkley Sargent Architects and Councilman Hunsaker & Associates as well as the requirements set forth by the World Waterpark Association, ASTM Standards on Amusement Rides and Devices, 1997 Uniform Building Code and all other local requirements.

Issues of life safety with regard to ride access and structural design to resist applied live, dead, wind and seismic loads are all the responsibility of Busey Schmidtberger Engineering, LLC, a sub-contractor of Splashtacular, and have been designed in accordance with the above referenced criteria.

This letter is also to certify that an on site certification of the waterslide was performed on August 8th, 2004 by Jeff Oroke, a representative from Splashtacular, Inc. and was found to have been installed in accordance with the structural drawings, and meets all applicable codes as well as specifications.

If you have any questions please call us at 800 844-5334.

Sincerely,

Splashtacular, Inc.

Steven Jay Levine
