To: Planning and Zoning Commission

From: Katasha Smithers, Planner I

Subject:

Consider a recommendation for a Site Plan with two variances located on a 1.712-acre property, located on the east side of Keller Smithfield Road, approximately 425-feet northeast of the intersection of Keller Parkway and Keller Smithfield Road, being a portion of Tract 3A12, Abstract 424, Dunham, J A Survey, zoned Town Center (TC), and addressed as 100 Chandler Road (Account#:03853381). John McClure, McClure Partners, Applicant; Greenway-Keller, L.P., Owner. (SP-20-0015)

Background:

On April 14, 2020, City Council approved McClure Partners' SUP request to construct a 12,180 square-foot, single-story liquor retail store in the Town Center zoning district per Ordinance 1968. During this meeting, the City Council requested the Applicant utilize both a masonry wall and live screening adjacent to the residential subdivision along the north property line. The Applicant's proposed site plan reflects both a wall and live-screening.

In the Town Center zoning district, all site plans are required to be brought forward to Planning and Zoning Commission for recommendation and to City Council for approval. Today, the Applicant is bringing forward the Site Plan with two variances.

Site Layout:

The Site Plan complies with all setbacks and building and fire codes.

Architecture:

Elevations are primarily brick and stone. The Applicant added windows with canopies on the north, south, and west elevations. The windows located on the east side do not have canopies because this is the same side as the loading area.

The elevations meet the requirements of the UDC.

Lighting:

Per the photometric plan, the light levels at the residential property line meet UDC requirements. The Applicant also meets all other lighting standards within Town Center zoning district.

Screening Wall:

The purpose of a screening wall between uses is to shield light and noise. The Applicant is proposing to erect an eight-foot masonry screening wall on the property line.

The screening wall meets the requirements of the UDC.

Landscaping:

The Applicant meets all landscaping requirements within the buffer areas adjacent to Keller Smithfield Road and to the residences.

In regards to the 30-foot buffer adjacent to the residences, in addition to the screening wall, the Applicant is also providing live-screening: nine - Live Oak trees on 30-foot centers, four Yaupon Holly trees, 97 Dwarf Yaupon Hollies, and 63 Dwarf Burford Hollies.

Also, the Applicant is providing 5-foot foundation plantings, trees, and bushes within the parking site.

The Applicant meets all landscape requirements per the UDC.

Tree Preservation:

The Applicant proposes to remove all the hackberry trees located on the northern property line, adjacent to the residences, to construct an eight-foot masonry screening wall. Per UDC 8.20, hackberry trees are not considered protected trees and can be removed without mitigation. The proposed Site Plan meets the requirements of the Tree Preservation Ordinance.

Sidewalks:

A five-foot sidewalk is being provided along Keller Smithfield Road along with four-foot sidewalks throughout the site.

Parking:

The parking ratio for retail use is one space per 200 square-feet. The proposed building is 12,180 square-feet and requires 61 regular spaces. The Applicant proposes 64 regular spaces and 3 handicap spaces; parking exceeds UDC requirements.

Drainage & Utilities:

Preliminary drainage and utility plans have been reviewed by City Staff and approved for Site Plan consideration.

Variance requests:

Per UDC Section 8.13 (H) states, "Alternate screening methods may be requested as part of the site plan review process and may be approved by the City Council."

1. UDC Section 8.13 (E) states, "Screening walls are required around refuse storage, trash

compactor, and loading areas.”

The Applicant requests a variance related to screening the loading area. It is located on the east side of the building and does not face right-of-way or the adjacent single-family development. The applicant proposes to utilize live-screening in lieu of the masonry screening wall because of space constraints.

2. UDC Section 8.13 (G) states, “Screening walls are required for ground-mounted utilities and heating/cooling units.”

The Applicant requests a variance to utilize live-screening in lieu of masonry screening, because the location of the electrical transformer box is near the loading area and does not have adequate space given the separation distance requirements designated by the electric company.

Summary:

Section 2.07(A)(2) of the UDC lists criteria for approval of a variance, the Planning and Zoning Commission and City Council shall consider the following factors:

- a. That there are special circumstances or conditions affecting the land involved such that the strict application of the provisions of this Code would deprive the applicant of the reasonable use of his land.
- b. That the granting of the variance will not be detrimental to the public health, safety or welfare, or injurious to other properties in the area.
- c. That the granting of the variance will not have the effect of preventing the orderly subdivision of other lands in the area in accordance with the provisions of this Code.
- d. That the granting of the variance will not constitute a violation of any other valid ordinance of the City of Keller.
- e. That strict compliance with the regulations, and/or that the purpose of the regulations will be served to a greater extent by the alternative proposal.

Citizen Input:

A Site Plan application, even with variances, does not require a public hearing, so no public hearing notifications were sent out to the surrounding property owners for this request. The public will have an opportunity to speak on this agenda item during the “Persons To Be Heard”.

Alternatives:

The Planning and Zoning Commission has the following options when considering a Site Plan with variances:

- Recommend approval as submitted (with requested variances).
- Recommend approval with modified or additional condition(s).
- Table the agenda item to a specific date with clarification of intent and purpose.
- Recommend denial.

City Council Action:

If the Planning and Zoning Commission takes action and makes a recommendation on this agenda item, then this Site Plan application will be scheduled for City Council action on June 16, 2020.
